lap joint  
fluted handle with lock  
Size 14cm

## Tweezers

Available for various purposes and are made out of a variety of materials in different designs.

### Types of tweezers:

-  Pointed:  
to remove splinters.
-  Slanted:  
to shape eyebrows or to remove hair.
-  Straight:  
to shape eyebrows or to remove hair.
-  Bent or angular with a straight mouth:  
exerts a particularly high pressure due to its angular shank and has a very firm grip.
-  Round:  
safe grip no sharp edges, special tweezers for safe round edge.

All tweezers are carefully produced, particularly on the functional part with the inner sides being ground to grip hair. It is made sure that the shanks of a pair of tweezers are of the same length.
